

Bug Report

Bug ID	BUG001
Title	Password length not validated for login() method
Severity	High
Class	UserLogin.java
Method	login()
Pre Condition	User created with valid credentials
Steps to Reproduce	1) Create User with Valid Credentials 2) Call <code>user.login("User123", "pass")</code> 3) Observe no exception is thrown
Expected	Illegal Argument Exception thrown - password is too short
Actual	ERROR: IllegalArgumentException to be thrown, but nothing was thrown.
Root Cause	Password length validator was added in the constructor, but was not present in the login() method
Fix	Added password length validator to the login method
Status	Fixed
